DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 & 41-55 drawn to a device and method of forming gas-enriched fluid using a mixer, classified in class 604, subclass 28. *mixing Chlor*
- II. Claims 56-67, drawn to a method of mixing blood and a fluid containing dissolved gas using a mixer with a pressurized chamber, classified in class 604, subclass 6.14.
- III. Claims ⁶⁸~~67~~-78, drawn to a blood oxygenating method, classified in class 422, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are independent methods that result in different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3762

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
